

# Compare The Smile Salon's Professional Teeth Whitening System To Other National Brands

## *Which one is right for you?*

Thousands of people each month use our professional system to whiten their teeth. And why not? Our systems contain the exact same products and brands used by dentists, but at a substantially lower cost. With all those over-the-counter whitening solutions like Crest Whitestrips and Colgate Simply White. So how do you determine which product is right for you?

### *Press On Strips*

The biggest difference between products lies in the strength of the gel and how well the gel clings to your teeth. Crest Whitestrips is an adhesive that sticks to your teeth, and bonds quite well. However, the amount of gel contained on the strips is very small and not powerful enough to show any significant improvement. As a result, it will take many applications to even start to show the types of improvements you expect.

### *Paint On Gel*

Colgate Simply White is a gel applicator that is applied directly to your teeth. You can control the amount of gel, giving you more control over the process. However, the strength of the gel is significantly less than professional gels. Also, once you close your mouth, saliva immediately begins to dilute the gel, reducing its effectiveness. As with Crest, numerous applications will be required to see any real results.

### *Professional Systems*

The Smile Salon product contains fast acting 22% Carbamide Peroxide with a desensitizing agent to prevent your teeth from being sensitive. Our custom form fitting impression trays mold to your upper and lower teeth for a precise fit. Our product is the same ingredients sold by the Top Cosmetic Dentist across the Country.

### **3 Simple Steps**

Our Teeth Whitening System is Fast and Easy to use. 3 Simple steps and you are on your way to a more beautiful and brighter smile. 1. Custom fit dental trays. 2. Brush & Floss your teeth. 3. Place the powerful teeth whitening gel in your custom dental trays and use 1 to 2 times per day until desired whitening is achieved.

It's that easy!

Our product is proudly manufactured in the USA!
